BEST RATION FOR THE PIGS

Economical to Make Use of All Available Skim Milk—Furnishes Necessary Protein.

In making up a ration for pigs, it is economy to make the best use of the skim milk available. Experiments have proved conclusively that where sufficient skim milk is available to furnish the protein content of the ration to balance up corn, it is not necessary for good economy to feed any kind of high protein concentrates to growing pigs.

The proper proportion in which to feed skim milk and corn for the best results, is from one to three pounds of the skim milk to one pound of corn meal, using the larger proportion of milk when the pigs are young, and gradually increasing the amount of corn meal in proportion to milk used.

For young pigs, the ration will be very materially benefited by the addition of a liberal portion of middlings,

Well Finished Bunch of Hogs.

which is a well-balanced feed for pigs. It is a difficult matter to estimate the amount of feed which will be required by 80 pigs up to August 1, as very much depends upon the capacity of the pigs to make rapid gains.

On good rape or alfalfa pasture, however, no more than 350 to 400 pounds of grain, or its equivalent, should be required for 100 pounds of gain. The value of skim milk can be reduced to a grain basis by figuring 350 pounds of skim milk to equal 100 pounds of grain when fed with corn in the proportion above advised.

Figuring upon this basis, it will not be difficult to estimate approximately the amount of feed which will be required for the time mentioned.

TREATING HORSE FOR THRUSH

Hoof Should Be Trimmed Properly, Diseased Parts Removed and Strong Disinfectant Applied.

(By M. H. REYNOLDS, Minnesota Experiment Station.)

Thrush in horses' feet is frequently caused by standing in filth. This changes the texture of the hoof and infection follows. Continuous standing on very dry floors may also cause this trouble, while in some cases it is apparently caused by a contraction of the hoof.

When the horse is shod with high heel and toe calks or the wall of the hoof is allowed to grow very long and the horse stands on hard floor so that there is no pressure on the frog of the foot, the condition of the frog is impaired and it becomes subject to infection and disease. Cases of thrush need a dry, clean stall.

Trim the hoof properly, remove the diseased parts and apply a strong disinfectant over the sole of the foot. Any of the coal tar disinfectants may be used full strength. Pure carbolic acid may be used, care being taken that it does not run down the heel and burn the skin.

After the first strong disinfectant, calomel should be dusted over the diseased surface and some thick clay applied to the entire sole.

Working Brood Mares.

If mares are kept at light work the last few weeks they are benefited by being worked right up to foaling time. Brood mares are injured by severe work which requires them to strain or over-exert. Backing heavy loads is not a suitable task for mares heavy in foal. In most years enough mares will miss getting in foal to take care of the heaviest work. They are best off if rested for ten days of a couple of weeks after foaling.

Whey for Pigs.

Ordinary whey is worth not more than half as much as skim milk or buttermilk when fed the pigs. Most of the muscle-building material is taken out of milk by cheese, and the resulting whey is very poor in muscle builders, as compared with ordinary milk. It takes about a gallon and a half of whey to equal the feeding value of one pound of corn or barley.

THE MISANTHROPHE

By ETHEL WARD MESERVEY.

(Copyright, 1914, by W. G. Chapman.)

"Vapid, profitless, almost unendurable," was the way Ralph Burt described life as it presented itself to his distorted view.

Then he became very much ashamed of the misanthropic utterance. He glanced about his lonely but elegant home, he looked into a mirror and noted the unusual glow of health upon his cheeks, he realized that he had not a real care in the world. Outside the birds were singing, the flowers blooming, all radiant nature breathing purity, peace and promise. The sun shone at its brightest. Its rays glorified the redolent garden. Beyond it lay a sportsman's paradise—stables, kennels, garage and hangar. It represented the latest facilities for pleasure.

"Yes, with all this, I may well be ashamed of myself for finding nothing worth living for!" murmured Burt, self-reproachfully.

Burt went out to the spot where the hangar was located. With the assistance of his hired man the superb biplane he operated was wheeled out.

He had become quite an expert aviator and enjoyed his air trips greatly. Under his expert direction the machine struck an upward lateral course, a thing of life and beauty. He enjoyed the rare exhibition of pure air and bird-like speed immensely.

Ten miles accomplished, Burt vol-planned to a meadow stretch to adjust a trivial defect in the control mechanism. He had just got in trim to resume his cloud work, when a shout down the highway attracted his attention.

With both interest and indignation the amateur airman observed a lad of about fourteen running towards him as if for his life.

Struggling behind him, but in hot pursuit, were three men. They were shouting and gesticulating. One carried a cane, which he waved menacingly. A second had picked up a lot of stones. These he hurled with varied aim after the running boy.

"You young rascal!" roared the man in advance. "Drop it, I tell you, or I'll have you jailed!"

But the little fellow never heeded the threatening cries and actions of his pursuers. He forged straight ahead, momentarily nearing the spot where Burt stood.

"This way! This way!" shouted Burt, as the boy came nearer. "Climb under the fence."

"Oh! oh!" yelled the lad just at that moment, in frantic pain.

"Brace up!" cried Burt, leaning over and lifting the lad clear of the entangling wires. "Now, then, who are those men?"

"Villains! They'll kill me—and you, too. Oh, they're coming!"

They were, indeed, but Burt was going. He lifted the helpless lad in his arms bodily, and made a run for the biplane.

"Don't get frightened," he ordered, placing his charge in the seat behind the pilot post and hurriedly strapping him in.

"Quick, mister! oh, quick as you can!" insisted his passenger, with a terrified glance at the fence.

The three pursuers had arrived. One tried to jump the fence and his feet tripped and he fell with a thud. A second attempted to crawl under the lower wire and his clothing had become entangled.

"Don't you interfere with that boy or you'll be liable to the law!" he shouted at Burt.

The latter paid no attention to the threat. He sprang to the pilot seat. Chug-chug—whirr! and the biplane went aloft like an arrow.

The dismayed and chagrined men below vainly vented their wrath on the rescuer who had baffled them. The little fellow sat spellbound with delight at the rare sensation of an air flight he had never dreamed of. For the first time in his life Ralph Burt had found his mind invested with real human interest. It elevated him. An actor in an exciting and unusual circumstance, he was eager to learn what lay behind the strange incident of the hour.

Soon he knew all about it, for when the biplane landed on home ground he took his passenger into his library and questioned him.

It came out that he and his sister, Eleanor, were practically prisoners in the power of one of his three pursuers, Giles Warden. Fearing foul play, the sister had that day given him the will of her dead father, with the injunction to place it in the hands of some lawyer for safety and action. Hence the pursuit.

"Righting a wrong—quite heroic!" commented Burt's lawyer, when he was made aware of the facts in the case. "Why, your new experience has made you look like a new man. I'll soon have this affair straightened out."

It was with a good deal of surprise that Ralph met "Sister Eleanor" a week later. He had supposed her to be a little girl. Instead, confusedly, he listened to the ardent thanks of a beautiful young lady.

"You have saved Miss Morley from captivity and the loss of her fortune," advised the lawyer. "She may continue to need a friend."

Day by day Ralph Burt's heart warmed to new impulses. There came a finality presaging lasting contentment. It was when Eleanor became something more than a friend—his wife.

MANY TROUBLES DUE TO AN INACTIVE LIVER

Many of the troubles of life such as headache, indigestion, constipation and lack of energy are due to inactive livers.

GRIGSBY'S LIV-VER-LAX is a natural, vegetable remedy that will get the liver right and make these troubles disappear. It has none of the dangers or disagreeable effects of calomel.

Get a 50c or \$1 bottle of this splendid remedy from your druggist today. Every bottle bears the likeness of L. K. Grigsby, who guarantees it through.

Land for Sale

Life is too short to go on renting land, when you can buy a small farm for almost the rent money.

I have land in small lots around Johnston, and near Batesburg, Meeting Street, Celestia, Rocky Creek or Fruit Hill, Ropers and near Edgefield, and lots and stores in the town of Edgefield.

A New Model Typewriter

Yes, the crowning typewriter triumph is here!

It is just out—and comes years before experts expected it! For makers have striven a life-time to attain this ideal machine. And Oliver has won again, as we scored when we gave the world its first visible writing.

There is truly no other typewriter on earth like this new Oliver "9." Think of touch so light that the tread of a kitten will run the keys!

CAUTION! The new-day advances that come alone on this machine are all controlled by Oliver. Even our own previous models—famous in their day—never had the Optional Duplex Shift. It put the whole control of 84 letters and characters in the little fingers of the right and left hands. And it lets you write them all with only 28 keys, the least to operate of any standard typewriter. Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

WARNING! This brilliant new Oliver comes at the old-time price. It costs no more than lesser makes—now out-of-date when compared with this discovery. For while the Oliver's splendid new features are costly—we have equalized the added expense to us by simplifying construction. Resolve right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does. If you are using an Oliver, it naturally follows that you want the finest model.

17 Cents a Day! Remember this brand-new Oliver "9" is the greatest value ever given in a typewriter. It has all our previous special inventions—visible writing, automatic spacer, 6 1/2-ounce touch—plus the Optional Duplex Shift. Selective Color Attachment and all these other new-day features.

Yet we have decided to sell it to everyone everywhere on our famous payment plan—17 cents a day! Now every user can easily afford to have the world's crack visible writer, with the famous PRINTYPE, that writes like print, included FREE if desired.

TO-DAY—Write for Full Details and be among the first to know about this marvel of writing machines. See why typists, employers, and individuals everywhere are flocking to the Oliver. Just mail a postal at once. No obligation. It's a pleasure for us to tell you about it.

The Oliver Typewriter Co., Oliver Typewriter Bldg.,
Chicago, Illinois

You can rent the Oliver Typewriter three (3) months for \$4.00

A Pee Gee Finish For Every Purpose

Partial List of
Pee Gee
Guaranteed Finishes

Pee Gee Flatcoat for Interior Walls and Ceilings

Pee Gee China Enamel for Interior Woodwork

Pee Gee Specification Varnishes

Pee Gee Floor Wax

Pee Gee Penetrating Distain

Pee Gee Porch Paint

Pee Gee Semi-Paste Roof and Barn Paint

Pee Gee Creo-Stain for Roofs

Pee Gee Adamant Floor Paint

Pee Gee Wagon and Implement Paint

Pee Gee Portlandite for Concrete

Pee Gee Blue Ribbon Family Paint

Pee Gee Screen Enamel

If you are intending to build, repaint or redecorate, you should investigate the merits of Pee Gee Finishes. Remember the cost of labor is the same whether you use poor paints and varnishes or the Pee Gee kind. You want your buildings, inside and outside, to look attractive. You want to avoid the expense and trouble of frequent refinishing. Specify Pee Gee Finishes—the kind that has stood the test for almost a half a century.

MASTIC PAINT

"The Kind That Lasts"

COVERS more surface, lasts longer, looks better and is more economical than Keg Lead and Oil, hand mixed paint or ordinary ready mixed paint. MASTIC PAINT is made of pure White

Lead, re-inforced with Zinc Oxide in the correct proportions, and pure Linseed Oil. It does not scale and keeps its color for years. The formula appears on every can.

FREE

Ask us for beautifully illustrated booklet, "Homes and How to Paint Them." Also for color cards, booklets of any Pee Gee Finish you may desire, or write for them to PEASLEE-GAULBERT CO., Incorporated, Louisville, Kentucky.
